# *I<sup>2</sup> "Implementing Integrity" Skálholt, Iceland, 18-23 November 2011*

Integrity, trust and reputation are intrinsically linked. A strong internal culture and effective management strategies are important for enhancing reputation and minimizing the impact and likelihood of fraud, corruption and other transgressions of integrity.

This workshop is for senior managers in both the public and private sector wanting to build reputation and protect their organizations through demonstrated integrity.

The sessions are taught by internationally renowned experts applying a combination of stimulating teaching methods.

## **Objectives**

The seminar will embed proven management strategies among the participants enabling them to enhance reputation and integrity within their respective organizations. This will be done by providing:

- An **in-depth understanding** of the relationship between integrity and reputation.
- A **proven methodology** for identifying and addressing integrity, fraud and corruption risks to your organization.
- Short and longer term **management strategies** for ensuring an ethical organizational culture and reputation protection.
- Methods for communicating to customers and other key stakeholders that you are worthy of their trust.

## The Location

The 2-day intensive workshop will be conducted in the School of Skálholt in South Iceland. This location offers serenity, beautiful nature and comfortable but simple facilities which will create an environment conducive to in-depth exploration and engagement.

## The Teaching Methods

The programme is designed to enable frequent round table interaction between participants and the teachers, making the learning experience more intense and rewarding.

A number of innovative and engaging methods will be deployed. Prior to the workshop the play Icephoenix will be performed for all staff within organizations sending participants to the workshop. The awareness of ethics and CSR created by the play will make the organization's staff more receptive to new approaches to be applied by the managers participating in the seminar. See attachment for further information on the play.

The workshop itself will use actual examples, original filmed dramatizations, short lectures, feedback sessions, realistic case studies, and other exercises to illustrate and address the challenges managers face in building ethical organizational culture. Discussions will be organized within the conference room as well as in Skálholt's comfortable lounge.
